

# Deploying Intelligent Storage for Video Surveillance and Physical Security

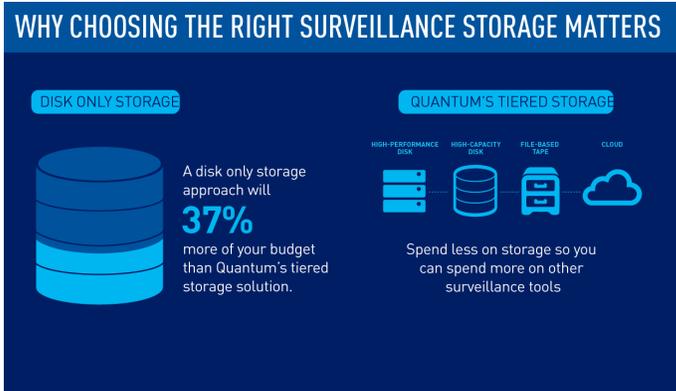

The video surveillance industry is undergoing a significant transformation—it is much more than simply observing crimes. Challenges created by more cameras, higher resolutions, and increasingly complex analytics are creating an influx in data, and managing this infrastructure takes an intelligent, scalable storage platform. Quantum's video surveillance data storage solution has the ability to tier storage, which will save you money without reducing video quality, retention time, or camera streams—allowing you to invest more in other tools needed to successfully keep people and property safe.

## PERFORMANCE MATTERS.

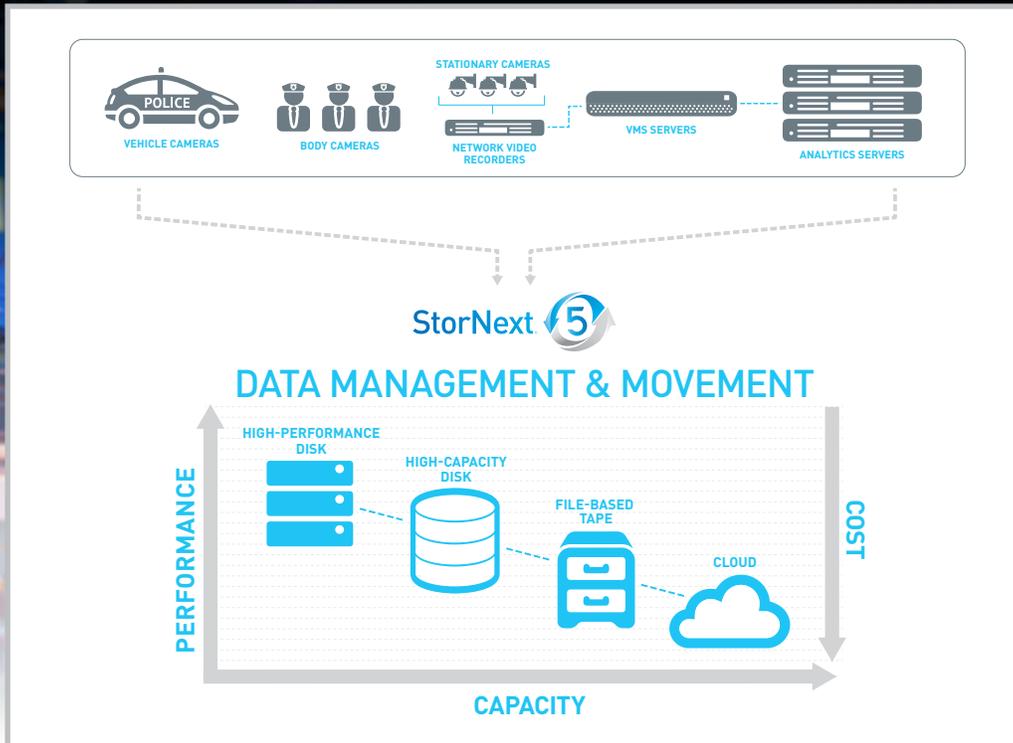

As the amount of cameras deployed and camera resolutions and capabilities continually expand, there is a greater need to deal with more streams of video data concurrently.

## STORE MORE CONTENT. SPEND LESS MONEY.

Quantum's surveillance solution offers the ability to automatically tier data over time from one type of storage to another, based on your customized policy. Tiering empowers the movement of less-frequently used data to the most cost-effective storage with best-in-class data integrity.

# QUANTUM = FOUNDATION OF VIDEO SURVEILLANCE INFRASTRUCTURES

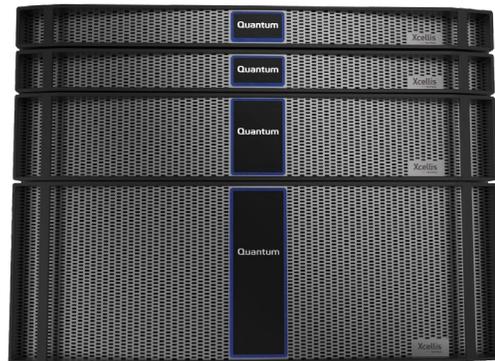

## IMMEDIATE ACCESS TO DATA

From the user's point of view, when a file has been tiered to a different type of storage, the file looks like it's right where you left it; it's as easy as looking at your C: Drive.

## STORAGE BUILT FOR THE CHALLENGES OF VIDEO SURVEILLANCE

With Quantum, you no longer have to choose between performance, reliability, and cost-effective storage—you get it all. We help you design and implement a storage solution that puts your data in the right place, at the right time.

Our solution allows end-users to archive files long term, allowing them to spend more on other tools in their surveillance workflow.

### ABOUT QUANTUM

Quantum is a leading expert in scale-out storage, archive and data protection, providing solutions for sharing, preserving and accessing digital assets over the entire data lifecycle. From small businesses to major enterprises, more than 100,000 customers have trusted Quantum to address their most demanding data workflow challenges. With Quantum, customers can Be Certain™ they have the end-to-end storage foundation to maximize the value of their data by making it accessible whenever and wherever needed, retaining it indefinitely and reducing total cost and complexity.
